Senior Network Engineer

Description

You'll join an engineering team that manages global infrastructure for a Fortune 500 client of Frontline Managed Services. Your focus: stabilize, upgrade, and expand core network services.

Your first 6 months will involve hands-on implementation and troubleshooting, especially around Palo Alto SD-WAN rollouts and Azure Virtual Network integrations. Over time, you'll take on design and project ownership roles.

This is a customer-facing position. You'll work directly with stakeholders across IT and security to plan and execute network changes with zero business disruption.

Responsibilities

- Configure and support Palo Alto SD-WAN edge devices and tunnels.
- Help deploy and maintain Azure VNets and hybrid cloud connectivity.
- Troubleshoot routing and wireless issues across LAN, WAN, and WiFi networks.
- Assist with merger-related network integrations and office buildouts.
- Document and transition all designs to operations teams.
- Escalation support for complex, high-priority incidents.
- Mentor junior engineers and ops teams.

Qualifications

- 5+ years supporting enterprise LAN, WAN, WiFi, and VPN environments.
- 2+ years deploying and troubleshooting Palo Alto SD-WAN.
- Experience with Azure networking: VNets, hybrid routing, and peering.
- Strong command of routing protocols, wireless diagnostics, and VPN tunneling.
- Ability to translate business needs into technical solutions.
- Excellent documentation and communication skills.
- Cisco switching experience (Catalyst, Nexus, Meraki).
- Understanding of VoIP QoS and traffic shaping.
- Experience with RADIUS or 802.1x implementations.
- Familiarity with BC/DR networking: HSRP, redundant circuits, etc.
- Certifications like PCNSE, CCNP, or Azure Network Engineer Associate .

Education

- Bachelor's degree in computer science, Information Systems Management or related field, or combined equivalent of education and experience.
- Hands-on experience designing, configuring, managing, and troubleshooting Fortinet FortiGate firewalls, including implementing security policies, VPNs
